TREKKING

MODULAR

Not only do our openly available frames comply with all current market requirements, such as modern design, a trailblazing geometry, 27,5+ or 29" wheel size and high-performance rear-suspension technology, but also you can rely on our superior Quality and QC standards, on-time delivery and uncomplicated warranty settlement.

We supply our customers even starting from moderate qty's. On top of that we offer totally flexible possibilities for custom modifications, regarding design or geometry, even for smaller orders, without charging any start-up cost.

Different categories and models, internal or external batteries, custom geometry, alternative tubing and gussets, suspension travel options, a lot of highly customizable options are available.

All Frames with integrated or external Battery

DX6 TYPE SHIMANO

4BAR TYPE BOSCH

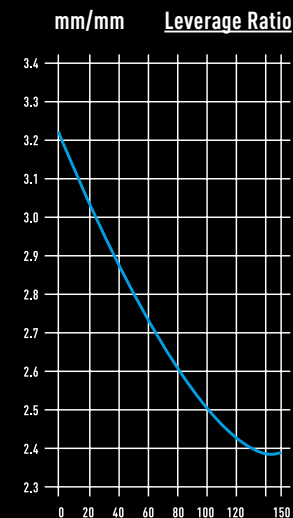

TT LINK TYPE BOSCH

We offer a wide variety of possibilities for your eMTB solutions. Simply choose from different suspension systems, travel levels, geometry settings, wheel size, rear axle width (O.L.D.), and tubing options to compose your favourite frame! All of the frames have been engineered using the latest 3D software and we are using leading kinematics software to optimise the suspension systems performance. Our frames are produced in one of the best bicycle frame factories in the world, so you can count on absolutely outstanding production quality and stability.
